FLOWER LOVER

WE LOVE

We love design

Simply clever lines. Stylish highgloss metallic surface.

We love plastic

UV resistant, weather-proof, lightweight yet durable. Plastic yet lovable!

We love to play

Combine diverse shapes and sizes to make unique sets. Go crazy!

We love space

Outside or the inside. Patio, shelf or bathroom floor. Table, window or as a lovely gift. Nothing is impossible!

We love to grow

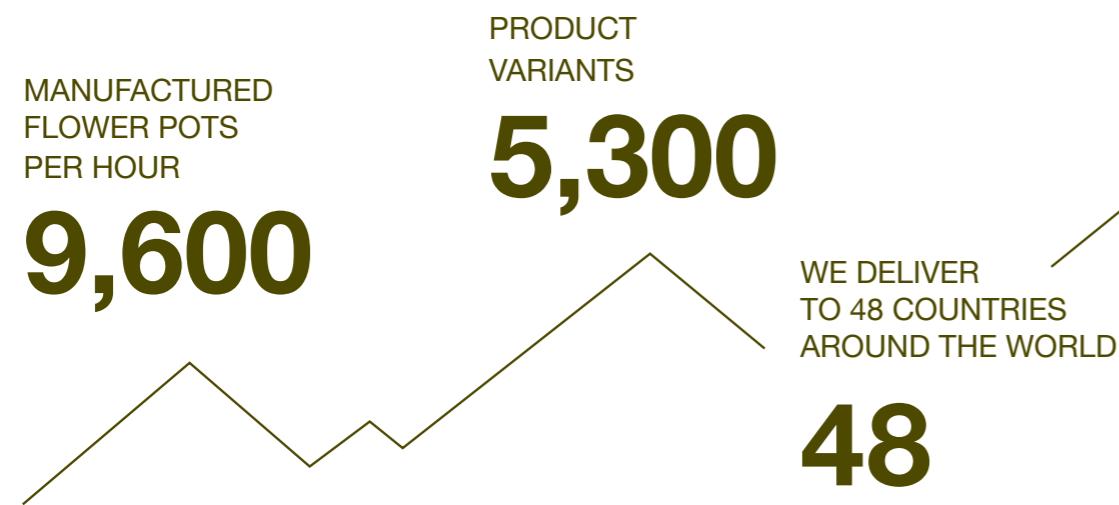

Years of experience led to the development of Flower Lover integrated sub-irrigation system. Balanced technically to suit most plants. Integrated aesthetically to please your heart.

FLOWER LOVER

YOUR SUCCESS IS OUR GOAL

We are a family enterprise with a long tradition. We have an understanding for our customers. We look for solutions and do not hide from problems. You will not find any corporate structure with us.

We want to inspire you and support your sales both with marketing tools and analyses and support at the point of sale.

Our manufacturing is in the EU

All our flower pots are 100% recyclable

73 % of our employees are women

“In Plastkon, we do not compromise between quality, experience and design. It is also really important to us to have a professional and reliable business relationship with all our clients.”

David Hama
Managing Director

We are always fair! We aim to build long-term relationships and develop joint business.

We are a Czech company, so we can offer you convenient delivery conditions and react flexibly to your individual requirements.

We occupy a stable second place on the European market in premium functional plastic flower pots.

FLOWER LOVER

SELF-WATERING SYSTEM

Our wide range of flower pots offer both interior and exterior solutions for your plants. Each product ensures maximum care for your plants thanks to the unique and accurate self-watering system. Last but not least, the great design of our products will enliven your apartment and garden.

Twist Liner

*Cobble

Moisture-absorbing wick

The moisture-absorbing wick will ensure a long life for your herbs. It turns occasional watering into continuous irrigation and thus brings the plant closer to its natural conditions in nature.

Separator

*Cubico Stone / Quadrato matt / Rondo Stone / Flora Aqua / Delto Stone

Water level indicator

The indicator allows you to see the current water level and shows the recommended minimum and maximum levels of water using the red lines on the crystal clear tube. The sole purpose of the two spacer plates is to make sure the indicator is always in a perfect vertical position. But do not worry, this piece is provided already assembled for you!

NEW PRODUCTS

FLOWER LOVER

FLORA AQUA

The elegant FLORA AQUA flower pot is a new product designed for indoor use. Its clean lines and matte surface in timeless colors of anthracite, white, and stone grey make it a stylish accessory for any modern home. FLORA'S sizes are based on a detailed analysis of the most popular container planter dimensions and are available in four variants 14 cm, 22 cm, 25 cm, and 30 cm. The set includes a smart self-watering system. It consists of a grid that separates the soil from the water reservoir, a fill tube with a cap, and a practical indicator stick that clearly shows the water level.

FLORA AQUA is the ideal choice for those who value subtle elegance, reliable function, and effortless plant care.

RONDO STONE

RONDO STONE

We performed a market analysis, during which we found the best-selling sizes of container pots and according to the data, we designed and developed a decorative pot that is compatible with container pots. So the only thing the customer has to do is to buy a plant, bring it home and just put it in our RONDO STONE. From time to time, the container pot is lower. In such a case just use the enclosed dividing grate and even a lower flower pot fits perfectly. The beauty of RONDO STONE is magnified by replicating a natural stone texture that offers an added value and an original twist on a classic design, which you won't find amongst the competition.

RONDO STONE EASY

For demanding customers who enjoy repotting their plants, we have designed the self-watering system Separator. It is included in the package and complements the flower pot's design with its timelessly shaped cap, which shows the water level using a green stick.

PRODUCTS

In today's market, you will find a very small number of producers of similar products. As far as competition goes, certain differences arise. The first and biggest difference is that you have to assemble the purchased product yourself at home, because it is sold in parts. Another difference is in the water level indicator, which is not integrated but protrudes like an antenna. There are often problems with small children breaking these protruding parts or pets destroying them. Then you have to buy spare parts that cost you extra. An equally important difference is that competing brands only include one funnel on the top part of the product. The problem occurs during watering when the product is hung at a greater height, causing water spills. For this reason, Plastkon has developed the Cobble with two holes, one at the top and the other on the side, into which the spout of a watering can fits perfectly.

PLAYFUL

FLOWER LOVER

CUBICO STONE

Perfect proportions allowing a wide range of uses. The beauty of CUBICO STONE is magnified by replicating a natural stone texture that offers an added value and an original twist on a classic design, which you won't find amongst the competition. The pot includes a drain valve and is therefore designed for both indoor and outdoor use. The sub-irrigation set includes a pot, a grate that separates the soil from the water reservoir, and a filling tube with a level indicator.

DELTO STONE

DELTO STONE is synonymous with perfect proportions and finely sharp edges, making it a great addition to any household with a wide range of uses, available in 4 different sizes and 3 colors.

Unique shape with elegant soft curves. The beauty of DELTO STONE is magnified by replicating a natural stone texture that offers an added value and an original twist on a classic design, which you won't find amongst the competition. The pot includes a drain valve and is therefore designed for both indoor and outdoor use. The sub-irrigation set includes a pot, a grate that separates the soil from the water reservoir, and a filling tube with a level indicator.

FLOWER LOVER

SUPREME STONE

SUPREME STONE is based on our Supreme Emblem, which was developed with a removable inner containers that you just pull out by the handles, take to the garden and repot. It contains a horizontal and fully integrated Hydro Power self-watering system, which shows the water level and lets you know when to water the flower with the help of a float and the subsequent colourchange from orange to green

SUPREME STONE is unique in its textured natural stone surface, which adds depth and interesting added value not found in competing brands.

Supreme is adapted for both indoor and outdoor use, where you only need to open the drainage hole to drain excess rainwater.

FLOWER LOVER

QUADRATO MATT

QUADRATO MATT

The simple and delicate shapes will beautifully complement your interior. Its design provides a large volume for the plant while saving space. These pots come in a matt finish. It does not have a drain valve and is therefore primarily intended for indoor use. The set includes a decorative pot and a self-watering set including a separator that separates the soil from the water tank, a filling tube and a water level indicator.

QUADRATO EASY MATT

These pots come in a matt finish. They do not have a drainage valve and are therefore primarily intended for indoor use. The self-watering set is not included. It can be purchased separately as an accessory.

COBBLE

Today there is a growing trend to have fresh herbs available at home. Everyone wants to have organic and fresh ingredients at home when cooking. Under normal circumstances, when you buy herbs at the supermarket, they do not remain fresh or survive in the pot for very long and soon die without repotting. In case you decide to repot, other issues arise: By buying potting soil that is only sold in large 25 kg packages, you are likely to make a mess and spend time cleaning it up. That's why our company has developed this smart pot. It solves this fundamental problem by you simply buying a plant, placing it in the pot, we call it Plug & Play, and it is ready to use within 30 seconds.

The COBBLE design features a combined matte and glossy surface for a modern look using laser engraving, which is very popular among our clients.

FLOWER LOVER

MUNGO

MUNGO is a bowl specially designed for germination of seeds, nuts and pulses. You can grow your own fresh sprouts or young shoots in bio quality at home. The bowl is made up of three tiers which allow 3 different types of seeds to germinate at the same time. It's easy to use!

Colours, sizes and sub-irrigation variations

colors / materials

050 007 128 156

sizes

Dimensions:
17 x 17 x 15,5 cm
Water: 0,5 L

crops suitable for germination

Properties

Spread the seeds on the surface of the bowl.

Excess water will accumulate in the bottom bowl, which needs to be regularly emptied.

The beans or other seeds germinate on approximately day 2-3 after soaking. If you let them continue to grow, on day 5 they'll become small green plants - the so called microgreens.

FLOWER LOVER

LARGO TRIO

LARGO TRIO, the large-volume window box is suitable for both indoor and outdoor use. It is the right choice for growing flowers, vegetables and climbing plants. Largo Trio also offers an elegant solution for dividing space and providing spacing between the visitors to restaurants, hotels and other public places. Largo Trio includes three independent containers so that you can grow three different plants at the same time. The individual containers can be easily removed from the box. The window box is integrated with a self-irrigation system, the watering hole and the water level indicator. If you wish not to keep water in the box, you can open the drainage outlet at the bottom of the container. Largo Trio is equipped with built-in castors for easy handling. Buy the unique vertical support for your window box which is particularly useful when growing tall plants such as tomatoes.
